VOICE VERIFY PRO – AUTOMATED VERIFICATION OF VOICE ASSISTANT SYSTEMS

Key Features

- Processing of extensive speech recordings – incl. NLU variants and crowd-sourced content
- Automated slot testing – e.g. top music charts, POIs, names
- Expert team – linguists and ISTQB-certified testers
- Optimized voice prompts – for a smoother user experience
- Scalable execution – parallel testing across multiple systems
- Seamless CI/CD integration – fits directly into your development pipeline

Benefits of VoiceVerify Pro

- ✓ Saves time through automation
- ✓ Reduces manual effort and cost
- ✓ Ensures consistent and repeatable results
- ✓ Detects errors early for faster resolution
- ✓ Improves accuracy by minimizing human error
- ✓ Enables performance monitoring under various conditions
- ✓ Supports continuous quality assurance

AI-Integration - Key Advantages

- ✓ Generates test cases automatically from customer specifications
- ✓ Analyzes and prioritizes relevant content from large datasets
- ✓ Expands test coverage with realistic, multi-lingual voice data
- ✓ Evaluates system responses using semantic AI models
